

Hub and Spoke Model with K Series Generators

CARIS Foundation Haiti *Projet Sante'* ensures a continuous supply of quality chlorine for 165 healthcare facilities and hospitals in targeted Districts that provides an adequate supply to meet Infection Prevention and Controls standards for environmental cleaning.

- First tested the concept of on-site chlorine production, packaging and distribution for one target region using 30 STREAM units.
- Establish 5 Regional production and packaging facilities (hubs) each equipped with a K7 Series generator, and distribution network to supply 165 healthcare facilities (spokes).
